< PERSONAL PROFILE

I'm a front-end developer and web designing enthusiast. When I was 11, I used my uncle's old computer at grandma's house to log into and maintain forum platforms. I changed up the graphics and the images by using CSS, HTML and Gimp/Photoshop. I had so much fun, you could say that's how my love for coding started. I've always enjoyed the most graphical aspects of it, but the technical part also amazed me and made me curious to learn.

I'm looking for a job that stimulates my creativity, and my current focus is on front-end development; that said, I also have an academic background in back-end, and I'm always ready to learn new things!

< WORK EXPERIENCE

🏢 NetResults S.r.l | Front-end developer | 40h/w

September 2022 - September 2023

- Maintained a VoIP React web-app written in JavaScript, CSS (emotion-styled), HTML, and node.js, ensuring smooth functionality and performance.
- Enhanced the web-app's usability by implementing responsive design, making it accessible on both desktop and mobile platforms.
- Collaborated with a team to identify and resolve bugs, improving the overall user experience.
- Implemented and managed version control using Git/GitHub, ensuring effective collaboration and efficient project management.
- Demonstrated strong problem-solving skills, successfully troubleshooting and resolving issues related to the web-app's functionality and performance.
- Actively participated in code reviews and contributed to continuous code improvement initiatives.
- Effectively communicated with team members and stakeholders, providing timely updates and progress reports on the web-app's maintenance and development activities.
- Engaged in daily Scrum meetings, demonstrating teamwork and Agile methodology familiarity

WORKED WITH: Javascript, React, node.js, CSS (emotion-styled), HTML, Git, Scrum

🏢 TD Group S.p.A. | Java developer | 40h/w

April 2022 - September 2022

- Developed proficiency in Java programming language through practical exercises and hands-on experience to enhance problem-solving skills and logical thinking
- Demonstrated ability to write object-oriented programs from scratch using Java
- Applied best practices and coding standards to ensure efficient and readable code
- Collaborated with team members to accomplish project goals and deliver high-quality software solutions

WORKED WITH: Java

< SKILLS & COMPETENCES

■■■■ CSS
■■■■ HTML
■■■ Javascript
■■■ React
■■■ node.js
■■■■ git
■■■■ Linux
■■■■ Graphic manipulation programs (Photoshop, Gimp)
■■■ Building graphic interfaces/web pages
■■■ noSQL
■■■ SQL
■■■ UI/UX
■■■ Java
■■■ PHP
■■■ C# | .NET

■■■■ Very experienced (3+ years)
■■■ Experienced (1-3 years)
■■■ Basic knowledge/Learning

/ >

< LANGUAGE KNOWLEDGE

 **ITALIAN** | NATIVE SPEAKER

 **ENGLISH** | C2

 **DUTCH** | LEARNING

/ >

< HOBBIES

reading books, taking care of plants, gaming, watching tv shows

/ >

< ADDITIONAL INFO

The main project I maintained at NetResults was not open source, but you can see screenshots and videos of its functionality on my github portfolio, together with a few mock-ups and other projects I did for fun -> <https://dbsara.github.io>
