SARA DELLA BONA

SUPERIOR TECHNICIAN FOR THE DEVELOPING OF SOFTWARE APPLICATIONS AND ADMINISTRATION OF BUSINESS INFORMATION SYSTEMS
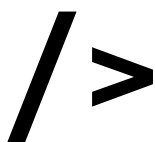

/ WHO AM I

Since I was in my early teens, I've been playing with the code, managing and designing forums, always enjoying the freedom of it.

After trying different options, I later decided to come back to it and achieve a technical diploma that would help me make it more than a hobby, pairing it with my self-taught knowledge of graphical tools.

I love the creative aspects of it - trying to create eye-catching but tasteful designs - but most of all I revel in the possibility of learning hands-on, through trial and error.

My life path might sound peculiar, but the background theme of it never changed: I love expressing myself through my passions, and I enjoy knowing things (among other more earthly things like books, food, music and vintage stuff). So what better field than this, constantly evolving, where you never stop learning?
